Jl. Sentosa 2 No.18, RT.9/RW.10, Kec. Klp. Gading, North Jakarta, Special Capital Region of Jakarta 14240

I am a Full- Stack Developer specializing in enterprise- grade software development. I engineer scalable backends (Node.js, Spring Boot, .NET, Laravel) and dynamic frontends (Vue.js, Next.js). My expertise includes complex system integrations like custom SDKs for access control (HID), OCR, and OCPP 1.6 for EV Charging networks. I have successfully delivered comprehensive VMS, attendance platforms, and routing- enabled catering systems. Bridging development and DevOps, I manage end- to- end lifecycles — configuring cloud servers from scratch and orchestrating secure deployments. I am a collaborative problem- solver focused on reliable systems.

Work Experiences

PT. Starlink Teknologi Integrasi - North Jakarta, Indonesia

Nov 2023 - Present

Fullstack Developer

- Lunavis Access Control: Developed a centralized building security system utilizing a custom-built HID Aero and Vento SDK engineered in .NET and MQTT.
- Attendance Platforms (Lunavis- Absensi & Masukaja): Managed Full- Stack development for Lunavis and Backend REST API architecture for Masukaja (supporting Mobile & Vue.js web). Integrated custom HID Amico SDK and Timy, featuring date-range holiday logic and automated daily logging.
- EV Charging (OCPP 1.6): Built the core backend and OCPP servers (Node.js, Spring Boot, MongoDB) for real-time monitoring, logging, and control logic of EV chargers.
- Lunavis VMS & Card Management: Created enterprise visitor and access systems integrating OCR, ACM Avigilon, and facial recognition (HID Amico, Suprema) for secure card-based entry.
- LimaRempah (Catering Platform): Developed a catering ordering backend featuring an automated route distance calculation API for efficient logistics.
- NagoPOS (Point of Sale): Engineered a POS backend with seamless Xendit Payment Gateway integration for secure transaction processing.
- Infrastructure & Deployment: Configured Ubuntu/ Debian cloud servers and VMs from scratch via SSH. Managed tailored deployments utilizing Docker (Next.js), Nginx (Vue.js builds), and PM2 (Node.js), complete with full HTTP/HTTPS (SSL) setup and GitLab versioning.

CV. Elisoft Technology - East Jakarta, Indonesia

Jul 2022 - Dec 2022

Internship/Web Developer

- Full-Stack Development & QA: Developed frontend and backend features, integrated APIs, and conducted functional testing/debugging to ensure application stability.
- Database Design: Designed and optimized relational databases (ERD & normalization) to maintain data integrity and performance.
- Server Deployment: Configured server environments (web server, database) and deployed applications to production on Ubuntu VPS.

Education Level

Politeknik Negeri Indramayu - Indramayu, Jawa Barat

Aug 2019 - Oct 2023

Applied Bachelor Software Engineering, 3.45/4.00

- Awards: National Finalist at KMIPN (E-Government Category).
- Scholarship: Bidikmisi Merit Awardee for Academic Excellence (Maintained GPA ≥ 3.0).
- Certifications: MikroTik MTCNA, BNSP Network Administration, and Cisco IT Essentials.
- Organization: Head of Japanese Language Division at FOLAFO.

Organization Experience

Foreign Language Forum (FOLAFO)

Jun 2020 - Jun 2021

Head of the Japanese language division

- **Curriculum & Mentorship:** Developed N5-level learning materials and mentored members in basic Japanese language skills.
- **Event Organization:** Organized language seminars, workshops, and competitions, while coordinating cross-divisional internal events.
- **Program Management:** Boosted member engagement and participation by structuring, planning, and evaluating effective learning programs.

Skills, Achievements & Other Experience

- **Language:** Indonesia (Native), English (Intermediate), Japanese (Basic)
- **Interest:** Full-Stack Developer, Backend Developer, Frontend Developer, DevOps Engineer
- **Technical Skills:** Backend & APIs - Node.js (Express.js), Golang (Fiber), Java (Spring Boot), .NET, PHP (Laravel), REST API Development
- **Technical Skills:** Frontend & UI - HTML, CSS, Vue.js, Next.js, React.js, Bootstrap, Tailwind, Framer Motion, shadcn/ui
- **Technical Skills:** DevOps & Infrastructure - Linux (Ubuntu, Debian), Docker, Virtual Machines (VM), Nginx, PM2, Git, GitLab CI/CD
- **Technical Skills:** Hardware & Networking - Custom SDKs (HID Amico, HID Aero, HID Vento), EV Charger (OCPP 1.6), Computer Networking (MikroTik)
- **Technical Skills:** Databases - PostgreSQL, MySQL, SQLite, MongoDB
- **Achievements** (2021): Finalist in the National Polytechnic Student Competency Competition (KMIPN) in the field of E-Government
- **Projects:** Lunavis & MasukAja (Access & Attendance) - Built smart attendance and visitor systems using custom HID SDKs. Delivered a WebView MVP featuring date-range holiday calendars and automated daily logging.
- **Projects:** Lunavis (Access & Attendance) - Built a centralized building security and visitor management system utilizing custom-built HID Aero, HID Vento, HID Amico
- **Projects:** MasukAja (Smart Attendance) - Engineered the backend REST API for a facial recognition attendance platform, date-range holiday calendars, and automated daily logging
- **Projects:** EasyIn (EV Charging) - Engineered backend architectures and OCPP 1.6 servers for real-time monitoring and control of EV infrastructure.
- **Projects:** LimaRempah (Catering Platform) - Developed a catering ordering backend integrated with an automated route distance calculation API.
- **Projects:** NagoPOS (Retail POS) - Created a comprehensive POS system for inventory and sales management, seamlessly integrated with Xendit Payment Gateway.
