Jl. Sentosa 2 No.18, RT.9/RW.10, Kec. Klp. Gading, North Jakarta, Special Capital Region of Jakarta 14240

Full-Stack Developer with 3+ years bridging enterprise software and physical hardware across modern stacks (Vue.js, Next.js, Node.js, Spring Boot). Engineered custom .NET SDKs for access and biometric controllers (Aero, Vento over MQTT, Amico) and OCPP 1.6 servers for EV charging. Delivered scalable platforms for visitor and employee management, attendance, logistics, and POS, utilizing Apache Kafka and WebSockets for real-time synchronization. Managed hybrid infrastructure (Cloud/ESXi) using Docker and custom Go-based agents for remote VM orchestration.

Pengalaman Kerja

PT. Starlink Teknologi Integrasi - **North Jakarta, Indonesia** Nov 2023 - Sekarang

Software Development & Engineering

- Access Control & Visitor Management (Lunavis): Engineered a full-stack (Next.js) visitor management system integrating custom HID hardware with Avigilon and Suprema controllers. Implemented WebSocket-based OCR for ID capture to automate access provisioning, replacing manual data entry at check-in.
- Custom Hardware SDKs: Wrote .NET SDKs for HID devices (Aero, Vento, Amico) by decoding their raw protocols, including 26/37/48-bit card formats, and integrated Vento over MQTT. Used Apache Kafka to sync facial recognition data across multiple edge devices with guaranteed delivery, even when devices go offline.
- Hardware-to-Software Integration: Mapped REST APIs from ACM/NVR systems and reverse-engineered hardware behaviors where documentation was missing, enabling seamless multi-vendor support in access-control applications.
- EV charging backend: Developed the core backend and OCPP 1.6 server (Node.js, Spring Boot, MongoDB) for real-time monitoring and control of EV chargers.
- Business applications: Built backends for MasukAja (attendance API with automated daily logging and holiday calendar), LimaRempah (catering logistics with route calculation), and NagoPOS (retail POS with Xendit payments).
- Infrastructure & deployment: Deployed services on Ubuntu/Debian with Docker, Nginx, and PM2. Built a Go agent and "Appliance Settings" UI to remotely manage on-premise ESXi VMs (network config, reboot/shutdown, automated Docker image updates), removing the need for on-site visits.

CV. Elisoft Technology - **East Jakarta, Indonesia** Jul 2022 - Dec 2022

Internship/Web Developer

- Full-Stack Development & QA: Developed frontend and backend features, integrated APIs, and conducted functional testing/debugging to ensure application stability.
- Database Design: Designed and optimized relational databases (ERD & normalization) to maintain data integrity and performance.
- Server Deployment: Configured server environments (web server, database) and deployed applications to production on Ubuntu VPS

Jenjang Pendidikan

Politeknik Negeri Indramayu - **Indramayu, Jawa Barat** Aug 2019 - Oct 2023

Applied Bachelor Software Engineering, 3.45/4.00

- Awards: National Finalist at KMIPN (E-Government Category).
- Scholarship: Bidikmisi Merit Awardee for Academic Excellence (Maintained GPA ≥ 3.0).
- Certifications: MikroTik MTCNA, BNSP Network Administration, and Cisco IT Essentials.
- Organization: Head of Japanese Language Division at FOLAFO.

Organization Experience

Foreign Language Forum (FOLAFO) Jun 2020 - Jun 2021

Head of the Japanese language division

- Curriculum & Mentorship: Developed N5-level learning materials and mentored members in basic Japanese language skills.
- Event Organization: Organized language seminars, workshops, and competitions, while coordinating cross-divisional internal events.
- Program Management: Boosted member engagement and participation by structuring, planning, and evaluating effective learning programs.

Keterampilan, Prestasi & pengalaman lain

- **Language**: Indonesia (Native), English (Intermediate), Japanese (Basic)
- **Interest**: Full-Stack Developer, Backend Developer, Frontend Developer, DevOps Engineer
- **Technical Skills** : Backend, APIs & Messaging - Node.js (Express.js), Golang (Fiber), Java (Spring Boot), .NET, PHP (Laravel), REST API, WebSockets, Apache Kafka, MQTT, Redis
- **Technical Skills**: Frontend & UI - HTML, CSS, Vue.js, Next.js, React.js, Bootstrap, Tailwind, Framer Motion, shadcn/ui
- **Technical Skills**: DevOps & Infrastructure - Linux (Ubuntu, Debian), Docker, Virtual Machines (ESXi), Nginx, PM2, Git, GitLab CI/CD
- **Technical Skills**: Databases - PostgreSQL, MySQL, SQLite, MongoDB, Prisma, Sequelize, GORM
- **Technical Skills**: Hardware & Networking - Custom SDKs (HID Amico, HID Aero, HID Vento), EV Charger (OCPP 1.6), Computer Networking (MikroTik)
- **Achievements** (2021): Finalist in the National Polytechnic Student Competency Competition (KMIPN) in the field of E-Government
- **Projects**: Custom HID SDKs - Developed .NET SDKs for HID controllers (Aero, Vento, Amico). Engineered bit-level decoding algorithms for 26/37/48-bit RFID card formats, and utilized Apache Kafka to synchronize real-time facial recognition data across Amico edge devices.
- **Projects**: Lunavis (VMS & Employee Management) - Centralized building security platform handling end-to-end visitor and employee card management. Implemented WebSocket- based OCR for ID capture to automate access provisioning.
- **Projects**: MasukAja - Smart attendance platform featuring automated daily logging, holiday calendars, and facial recognition APIs.
- **Projects**: EasyIn - EV charging infrastructure backend and OCPP 1.6 server for real-time remote charger management.
- **Projects**: LimaRempah - Catering ordering platform integrated with an automated route distance calculation API for logistics.
- **Projects**: NagoPOS - Comprehensive retail POS system with inventory management and seamless Xendit Payment Gateway integration.
